

- 1-Center pedestal sink in desired
- 2-Center of drain should be approx. 10-11" from wall. (faucet reach of 9-10" recommended)
- 3-Using caution when handling the pedestal sink, tip the sink slightly to allow a bead of latex adhesive caulk to be applied under footprint of the pedestal
- 4-To anchor to the wall we recommend using L brackets bonded to the trap access cavity with construction adhesive and bolted into the wall frame or blocking
